

TIP Solicitation Debrief

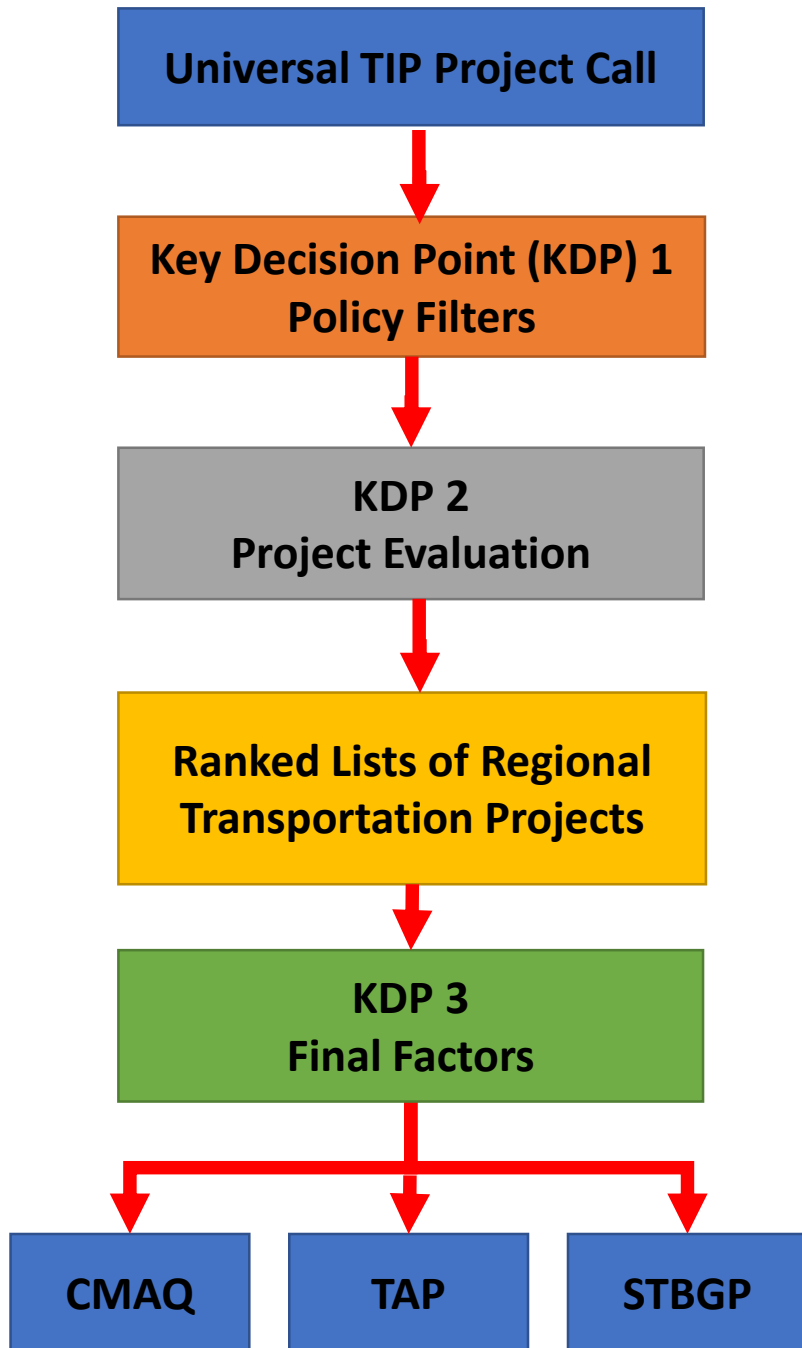

Transportation Coordinating Committee
May 18, 2018

Agenda

- Report on the Evaluation Process from the 2017 Project Solicitation
- Application Materials Review & Feedback
- Evaluation Process Review & Feedback
- Incorporate a resilience metric(s)

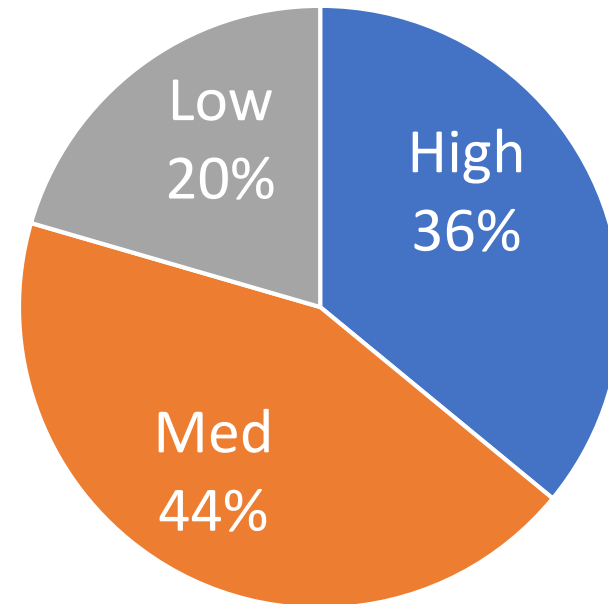

TIP Prioritization Task Force (2016)

Results from 2017 Solicitation

Funding by Local Priority

Funding by Performance

TIP Solicitation Application

➤ Application Component

- Save and return capability
- Increased standardization
- Help/tooltip prompts
- Accommodates uploads of supporting documentation

Section 3 - Planning Details

You have indicated that the primary project type of this proposal is "Bicycle". In order to properly evaluate the proposal, please answer the following questions, which provide the required sponsor inputs to allow ARC staff to evaluate your project. For further information, please refer to the [TIP Evaluation Framework manual](#), which may be found at www.atlantaregional.com/projectsolicitation

Mobility & Congestion Criterion

3-1) What is the Annual Average Daily Traffic (AADT) on the parallel roadway facility? *

3-2) Provide the year in which the above quoted AADT estimate originates from: *

3-3) What is the length (in centerline miles) of the proposed project route? *

3-4) Provide the posted speed limit on the parallel street: *

3-5) How many amenities/destinations are within 1/2 mile of the proposed project? * [?](#)

3-6) Is the proposed facility situated within 2 miles of a major university or college? *

Yes

No

Multimodalism Criterion

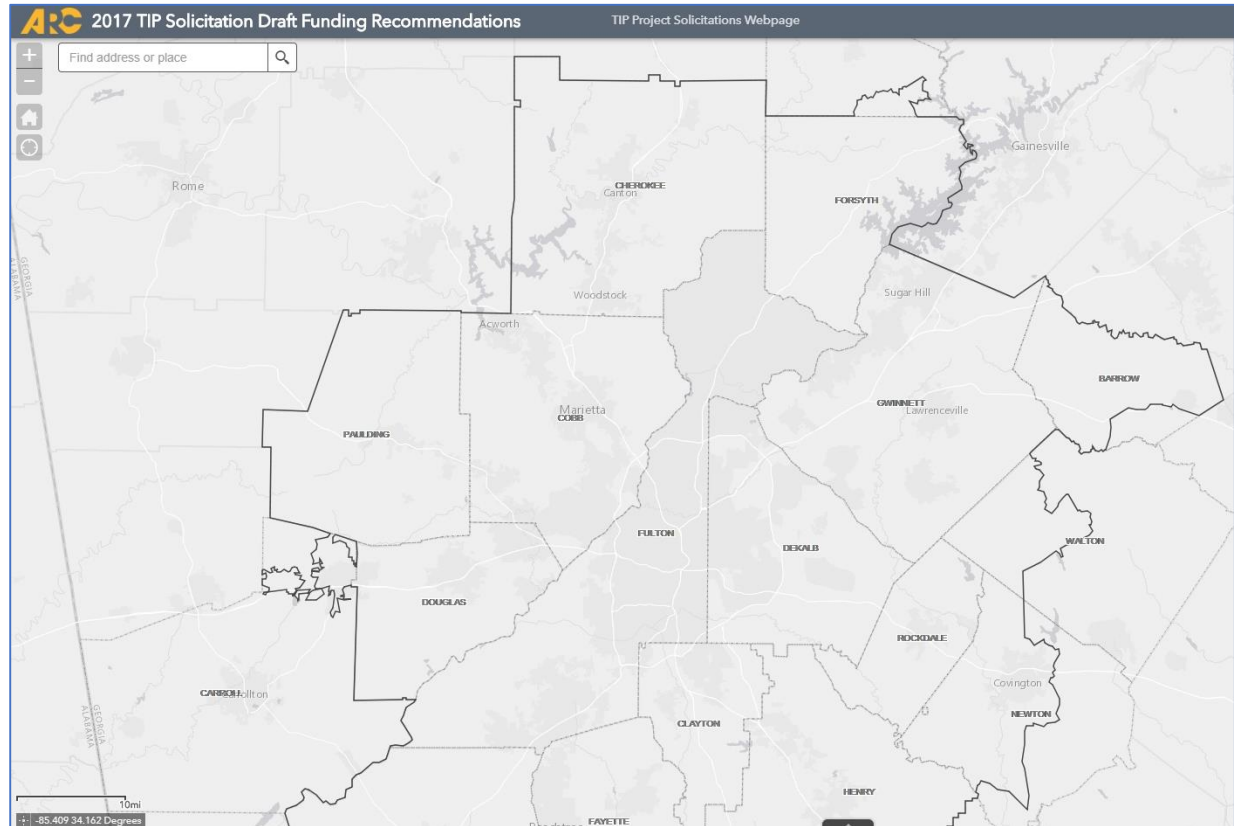

3-11) Use the text field below to document any additional project design elements of other modes being implemented as part of this proposal: * [?](#)

e.g. In addition to the primary purpose of this project (to widen Main Street to address congestion) this project will include ADA ramp upgrades at 1st, 2nd and 3rd street as well as an expanded bus shelter at 6th street.

TIP Solicitation Materials

➤ Mapping Component

- Account required; synched to application credentials
- Draw projects against a plain basemap
- Submissions open for inspection by all account holders
- Save and return capability

TIP Solicitation Materials

➤ Feedback Please!

- Overall impression?
- Suggestions for improvement?
- Feel free to send suggestions to [pbradshaw @ atlantaregional.org](mailto:pbradshaw@atlantaregional.org)

Overall Solicitation Process Feedback

- What do you all think of the 2017 solicitation process overall?
- Do you feel projects were scored fairly and that ARC staff used those scores appropriately in decision-making?

General Proposed Changes

- Transportation projects need to be submitted unbundled - so they can be discreetly evaluated - or information for all roadway links or transit lines must be submitted along with the bundled application
- ARC is suggesting some changes to the [TIP Project Evaluation Framework](#) - covered in the following slides

KDP 1 - Policy Filters

Table O1 – KDP1 Policy Filters

| Policy Filter Language | |
|--------------------------|---|
| General Filters | Project must originate from a locally adopted plan |
| | Sponsors must have Qualified Local Government (QLG) status current or pending |
| Roadway Capacity Filters | Project must be federal aid eligible |
| | Project must be located on a regional or national priority transportation network |
| | Project must include a complete streets component that is context sensitive to the existing community |
| | Rural projects should support economic competitiveness by improving multi-modal connectivity between regional centers |
| | Projects that are estimated to cost \$20 million or more must demonstrate a firm financial package |
| Transit Capacity Filters | Project must demonstrate a firm financial package |
| | Project must connect to an existing public transit service or regional center |

Table O2 – TIP Prioritization Task Force Project Type/Mode and Key Criteria

| Atlanta Region's Plan Goals | Performance Criteria | Project Types | | | | | | | | | |
|-----------------------------|------------------------------------|---------------|------------|-------|---------------------------------------|-------------------|--|-------------------|--|----------------------------------|--|
| | | Bicycle | Pedestrian | Trail | Roadway Asset Management & Resiliency | Roadway Expansion | Roadway Transportation Systems Management & Operations | Transit Expansion | Transit Asset Management and System Upgrades | Misc. Emissions Related Projects | |
| World Class Infrastructure | Mobility & Congestion | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | | |
| | Reliability | | | | | ✓ | ✓ | ✓ | | | |
| | Network Connectivity | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | | | |
| | Multimodalism | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | | | |
| | Asset Management & Resiliency | | | | ✓ | | | | ✓ | | |
| Healthy Livable Communities | Safety | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | | |
| | Air Quality & Climate Change | ✓ | ✓ | ✓ | | ✓ | ✓ | ✓ | ✓ ¹ | ✓ | |
| | Cultural & Environmental Resources | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | | |
| | Social Equity | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | | |
| | Land Use Compatibility | ✓ | ✓ | ✓ | | | | ✓ | | | |
| Competitive Economy | Goods Movement | | | | ✓ | ✓ | ✓ | | | | |
| | Employment Accessibility | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | | |

KDP 2 - Project Evaluation

Bike/Ped/Trail Modes

➤ General Changes

- Merge Bike & Ped into one category
- Include “wide-walks” as part of new bike/ped category

➤ Safety Measure

- Update safety countermeasures to emphasize crossings
- Remove crash rates and replace with Bike/Ped Crash Risk

➤ Network Connectivity Measure

- Tweak scores for “Network Connectivity to Other Facilities” metric
- Instead of Yes/No → vary score by connection type with more points for a connection to regional trails

Road Expansion/Asset/TSM&O Modes

➤ Safety Measure

- Extra emphasis on safety countermeasure focused on pedestrian crossings
- Add Bike/Ped Crash Risk Measure as a consideration

➤ Employment Accessibility Measure

- Existing Measure: Change in number of workers that can access regional employment centers within 45 minutes during peak periods
- New Measure: VISUM methodology that looks at employment accessibility based on a travel time delay curve - no sharp 45 min cutoff

Sample Travel Time Worker Distribution Curve

Number of Workers willing to Travel

Travel Time from a Traffic Analysis Zone

Transit Expansion

➤ Land Use Compatibility Measure

- Existing Measure: Average number of dwelling units/acre zoning provisions within ½ mile of transit stops
- New Measure: Add a parallel measure based on existing residential densities, which are easier to determine. ARC will take the better score of the two.

➤ Employment Accessibility Measure

- Existing Measure: Change in number of workers that can access regional employment centers within 45 minutes during peak periods
- New Measure: VISUM methodology that looks at employment accessibility based on a travel time delay curve - no sharp 45 min cutoff

Transit Expansion

➤ Social Equity Measure

- Existing Measure: Does the project serve an ETA community
- New Measure: Jobs accessible in ETA communities based on VISUM travel function

➤ Reliability Measure

- Existing Measure: No change to existing measures
- Additional Measure: Add a measure to account for the implementation of technologies like transit signal priority, off-board payment, etc (to be determined)

Transit Asset Management

➤ Asset Measure

- Existing Measures: Current age of asset, useful life-benchmark (for buses) and TERM scores (facilities)
- New Proposed Measure for Buses:
 - How many years (or percent) past useful life benchmark (at year of application or release of funds)
 - Vehicle miles between mechanical road calls/failures
- New Proposed Measure for Facilities:
 - TERM score

Incorporating Resilience

- All modes have a criterion for “asset management and resilience”
- ARC staff exploring new measures focused on system resilience through FHWA Resilience & Durability grant
- So far propose adding a measure to determine if the project is located on a critical and vulnerable facility
 - This information will be determined as part of the work associated with the grant

Weights

| Criteria | Bike/Ped/Trail | Roadway Asset Management | Roadway Expansion & TSM&O | Transit Expansion | Transit Asset Management & System Upgrades ⁵ |
|--------------------------------------|----------------|--------------------------|---------------------------|-------------------|---|
| Asset Management & Resiliency | - | 14.9 % | - | - | 24.4 % / 22.1 % |
| Mobility & Congestion | 13.7 % | 13.8 % | 13.0 % | 13.5 % | 21.6 % / 19.6 % |
| Safety | 14.5 % | 14.4 % | 13.4 % | 8.5 % | 13.6 % / 12.3 % |
| Network Connectivity | 14.4 % | 12.9 % | 12.4 % | 13.5 % | - |
| Reliability | - | - | 12.1 % | 12.0 % | - |
| Multimodalism | 12.6 % | 11.8 % | 11.3 % | 10.2 % | - |
| Employment Accessibility | 10.4 % | 10.2 % | 10.3 % | 11.6 % | 18.6 % / 16.8 % |
| Land Use Compatibility | 11.5 % | - | - | 10.5 % | - |
| Social Equity | 9.7 % | 8.3 % | 7.0 % | 9.5 % | 15.2 % / 13.8 % |
| Air Quality & Climate Change | 6.3 % | - | 7.3 % | 6.5 % | 0.0 % / 9.4 % |
| Goods Movement | - | 8.1 % | 7.8 % | - | - |
| Cultural & Environmental Sensitivity | 6.8 % | 5.5 % | 5.3 % | 4.1 % | 6.6 % / 6.0 % |

➤ Based off a survey of priorities ARC staff distributed to TCC and interest groups in 2016

➤ Missing Resiliency weights for several modes

➤ Prefer to hold off on changes until resiliency plan is complete in 2020?

Studies

- Separate application process that doesn't involve as much detail as project funding requests
- Scored based on a rubric similar to how we look at LCI funding
 - Study Need
 - Equity/ETA Area
 - Consistency with the Atlanta Region's Plan goals/objectives
 - Deliverability
- ARC staff is reviewing how other MPOs evaluate and will incorporate information into the application & KDP2 process

KDP 3 - Final Factors

- You can't put a number on EVERYTHING
- Preserves local decision-making, in line with SHRP C02
- Another lens to account for geographic equity, social equity, jurisdictional preference
