

MEETING AGENDA

Location: ARC Conference Center/Harry West Rooms
ARC's Offices, Peachtree Center International Tower
229 Peachtree Street NE, Atlanta, Georgia 30303

Wednesday, January 9th, 2019

8:00 AM to 8:30 AM: Arrival and Networking

8:30 AM to 10:00 AM: Meeting – Discussion topics below

Welcome and Introductions

Truck Friendly Lanes and Intersection Safety

Wavetronix will give a presentation on their work with the Truck Friendly Lanes project along SR 6 in Cobb and Douglas Counties. This project seeks to address safety for all drivers along the corridor while also maximizing freight vehicle progression between I-20, the NS Whitaker intermodal facility, and other industrial businesses.

Connected Vehicle Technology

Applied Information will give a presentation on their Glance TravelSafely app. This app is focused on safety and improved traffic operations, and has the potential for truck, bus, or other types of signal prioritization. Connected vehicle technology to support this app has been implemented in multiple locations in the Atlanta Region.

ARC ITS Architecture/TSMO Plan

ARC staff recently kicked off this plan, which is focused on transportation technology and related strategies for addressing traffic congestion and safety. We need your input on the transportation technologies ARC should consider to effectively support freight movement:

- Are the technology applications in the first two presentations relevant for you and/or your business?
- What other types of transportation needs do you have that could potentially be addressed by new technology such as traffic signal improvements, connected vehicle applications, smartphone apps, and more?

Other Items

- Member Introduced Topics
- Announcements
 - Nominations are open for the inaugural Atlanta Supply Chain Awards. Learn more at <https://www.atlantasupplychainawards.com/>.
