Performance Measures Timeline

Performance targets were established in MAP-21 Act (2012), and further supported in the FAST Act (2015) and recent IIJA legislation (2021) to ensure states and MPOs meeting federal goals and requirements

Target	Description	Update Schedule
PM 1	Safety	Annually
PM 2	Asset Management	Bi-annually
PM 3	System Performance/CMAQ	Bi-annually

Data is collected on an annual basis on all measures for both federal reporting and to check if states and MPOs are meeting their own targets.

ARC Recommended Actions

Target	Description	Recommended Action
PM 1	Safety	Support state targets & set MPO-specific targets
PM 2	Asset Management	Concur with state targets
PM 3	System Performance/CMAQ	Support state targets & set MPO-specific targets
