**\*\* Background check required and results may impact availability of training in these specific areas.**

The Atlanta Regional Workforce Development Board provides occupational specific skills training for industries that are stable or have projected growth. Skills training will not be provided in declining industries. Skills' training is only provided for jobs and careers where hourly rates and salaries are paid. Commission and fee based occupations will not be approved (this includes but is not limited to: real estate, cosmetology, massage therapy and nail technicians). Lists of additional sources of financial aid are available for clients who wish to pursue these careers. This listing serves as a guide, and is not meant to be all-inclusive. There may be additional occupations in which demand occurs based on the job market or specific opportunities within the broad spectrum of occupations. The ARWDB may provide training for a job where demand is limited, but current openings exist. **Local bona fide job offers may be required for training in limited demand areas in addition to demonstrating relevant experience. (5)** (Letter requirements are detailed on Page 2.)

1. Intermediate or higher level IT training requires previous IT related work experience and related "Prove IT" Assessment.
2. Black Belt training will be provided only to those holding Green Belt Certification. Combo Package approved rarely on case by case basis with extensive related work history.
3. Project Management Certification training requires extensive previous full scale project management experience, validation of experience required for certification, and Project Management "Prove IT" assessment.
4. Labor Market information dictates that relevant experience is required for certification in areas such as project management, human resource, financial planning and information technology. Staff will utilize assessment methods to determine if proficiency in relevant experience is sufficient.
