

Congestion Mitigation & Air Quality (CMAQ) Calculator Update

REQUEST FOR PROPOSALS: Questions & Responses

- 1. Would ARC consider accepting electronic submissions only, instead of Hard Copies and E-copies?**

ARC needs a hard copy too. "Firms must respond to this RFP with written proposals as well as electronic copies of their proposals in PDF format. Firms must email an electronic copy to Kyung-Hwa Kim at kkim@atlantaregional.org. ARC must also receive a hard copy via the address below. Please email confirmation and tracking number of the proposal to kkim@atlantaregional.org"

- 2. Will the table of contents and dividers count against the page limit?**

These are not counted. "Covers, end sheets, budget exhibits, DBE documentation, and a 1-2 page introductory letter shall not count against this maximum."

- 3. For Task 2, the scope indicates an update to emission rate method queries from a MYSQL database. We assume the development of MOVES 3 rates based on model data and other regional inputs is undertaken in a separate and prior process via Interagency coordination and this scope specifically involves post processing use of these previously developed data to interface with the updated calculator. Is this a correct assumption?**

Yes, you are correct.
