- 3. Update on Equity Tool**

*ARC strives to provide equitable community engagement and access to public information and services across the Atlanta region. This means ensuring the inclusion of members of minority and low-income populations during the planning and development of programs, policies and activities. Toward these aims, the Mobility Services Group is developing a series of reports and data analysis tools that aim to provide an understanding of equity as it relates to commuting, looking at the relationships among equitable target areas, the residential locations of workers in specific industries, differential access to transportation infrastructure, and mobility in the Atlanta Region. Understanding differences in mobility and access to transportation infrastructure among the working population in our region is key to addressing equity issues through TDM.*
