

Atlanta Model Users Group Agenda

Friday, March 11, 2016 - 9:30 am

ARC Harry West A & B, Level C

This MUG meeting is specifically dedicated to the unveiling of the Atlanta Regional Commission Activity-Based Model (ABM). The ABM will serve as the major travel forecasting tool in the ARC region. This model has been developed to ensure that the regional transportation planning process can rely on forecasting tools that will be adequate for new socioeconomic environments and emerging planning challenges. It is equally suitable for conventional highway projects, transit projects, and various policy studies such as highway pricing and HOT lanes analysis. The ARC ABM is based on the CT-RAMP (Coordinated Travel Regional Activity-Based Modeling Platform) family of Activity-Based Models. This model system is an advanced, but operational, ABM that fits the needs and planning processes of ARC.

- Kyeil Kim, ARC
- Jonathan Nicholson, Atkins

For future meeting dates and past presentations, please see www.atlantaregional.com/mug

For ARC model documentation and users guide, see www.atlantaregional.com/modeling
